

Addendum to the School of Nursing Standard Testing Program:
Kaplan Secure Predictor

NOTE: This addendum revises #s 5 , 6, 7, and 8 under “Standardized Testing Program” noted on page 23 of the 2021-2022 Nursing Student Handbook.

5. The Marian University Senior Comprehensive Exam requirement for BSN graduates is met by achievement of the benchmark for the Nursing Assessment Test (NAT A) administered during the last semester of senior year.

- a) Students who do not meet the benchmark on the first attempt will be required to:
 - i. Take the NAT A Repeat
 - ii. Reach the NAT A Repeat benchmark
 - iii. Meet with the Dean or Dean’s Designee if unsuccessful after the second attempt
- b) Students who do not pass or withdraw from the senior semester (semester 6 for traditional; semester 4 for accelerated) will have to take the NAT A as part of the senior comprehensive graduation requirement.

6. The Kaplan Secure Predictor will be administered in the final semester in NSG 493 according to the following schedule:

- a) The NAT will be scheduled in the 3rd month of the semester
- b) The NAT repeat in the 4th month
- c) The Secure Predictor early in the final month of the semester. (This would allow time for follow-up/remediation/reviewing results with faculty.)
- d) Students who do not pass or withdraw from the senior semester (semester 6 for traditional; semester 4 for accelerated) will have to take the Secure Predictor to fulfill graduation requirements.

7. Students are required to take the Kaplan NCLEX-RN Review Course scheduled after graduation.

8. Provided students are cleared by the Business Office, state licensure application documents will be sent. If there is any business hold on an account, documents cannot be sent until the hold is cleared.
